Upcoming Events – 2016

CCA - Mobile Carriers Show
Nashville, TN - 04/13 - 04/15

PCIA Wireless Infrastructure Show
Dallas, TX - 05/23 - 05/26

FTTH Connect 2016
Nashville, TN - 06/13 - 06/15

Visit www.kgplogistics.com/events.html for our complete schedule of 2016 events.

A photograph of two young children sitting on a lawn, looking towards a large screen that displays a cityscape. The child on the left is wearing a blue and white striped shirt, and the child on the right is wearing a light blue and white striped shirt. The screen is the central focus, showing a blurred cityscape with buildings and a blue sky.

PURPOSE BUILT FOR GIGABIT BROADBAND

Uniquely open and interoperable fiber-optic based access architecture enable service providers to expand their addressable market. Next-generation architectures and access technologies support the scale needed to unify Gigabit services across residential broadband, cloud connectivity and infrastructure backhaul applications.

Expect More Innovation, Solutions and Scale

CommScope has acquired
TE Connectivity's telecom,
enterprise and wireless
business.

You expect high quality, performance and dedicated service from CommScope. Get ready to expect even more: more innovation, solutions and scale to help you solve more wired and wireless network challenges around the world.

More Innovation Delivered

CommScope will deliver more innovative infrastructure solutions for the wireless, enterprise, broadband, telecom and fiber-to-the-x (FTTx) markets.

More Challenges Solved

Our expanded portfolio includes more fiber, DAS, data center, in-building communication and broadband access solutions.

More Scale Everywhere

CommScope will serve more customers around the world.

Duct Rodders Combine High Tensile Strength and Flexibility for Tackling Tough Underground Tasks

Constructed of fiberglass strands for exceptional strength, GMP Duct Rodders are essential tools for underground tasks such as cleaning and locating ducts, threading lines or pulling cables.

GMP Duct Rodders are equipped with a male-threaded fitting on the outboard end and a female-threaded fitting on the back end. The rods are available in three diameters: 1/4" (6.7 mm), 3/8" (9 mm) and 1/2" (12 mm), and in lengths from 100 to 2,000 feet (30 to 610 m) depending on the diameter.

GMP Duct Rodders are available in both Toneable and Non-Toneable rods. All come with carriers made of tubular steel alloy, powder coated or electro-galvanized for corrosion resistance. Repair and Accessory Kits are also available.

Durable outdoor signs communicate your important information, identify potential hazards, and help prevent accidents season after season. Use industry standard symbols and headers, or submit your own symbols and messages for a custom solution. We can use pre-approved layouts you provide or create custom artwork for you with headers and graphics that conform to current ANSI/NEMA guidelines.

PREMIER can help you configure the signage solution with the right message, graphics and materials to best meet your needs.

Material	Outdoor Durability	Vandal Resistance	Features	Thickness (inches)	Typical Lead Times
Aluminum	10+ years	No	Reflective and non-reflective finishes.	0.025" - 0.080"	3 Weeks
Polyethylene	5-10 years	No	Excellent for indoor / outdoor applications.	0.035" - 0.125"	3-4 Weeks
Co-extruded Polyethylene	30 years	Yes	Permanently engraved text. Excellent outdoor durability.	0.080"	3-4 Weeks
Fiberglass	10-15 years	Yes	Embedded graphics. Easy maintenance.	0.090" - 0.125"	3 Weeks
LEXAN®	10-15 years	Yes	Embedded graphics. Easy maintenance. Graffiti resistant.	0.090"	3-4 Weeks
Steel/Porcelain	25 years	Yes	Excellent outdoor durability.	0.044" - 0.070"	5-9 Weeks

3M™ - Cross-Connect Cabinets for Midspan Applications

3M™ Cross-Connect Cabinets for midspan applications are low-count cabinets available in configurations that can accommodate 100 pair to 1200 pair. These cabinets are modular in design and can be used in pad, stake or pole/post mount applications. In addition to midspan applications, the empty cabinet “shells” can be used to replace damaged cabinets. Developed for telcos deploying rural broadband, they are designed to be used with the 3M™ Quick Connect System (QCS) 2810. The wiring harness includes either 3M™ 710 OR 3M™ MS2™ Splicing Modules for easy splicing and maintenance.

The 3M™ 4220SV Cabinet series is designed to enable a midspan cabinet application and are intended to work in conjunction with one to four 48-port hardened DSLAMs. These cabinets are open base and empty and are designed to mount optional and accessory components, such as a power junction box (JBOX), which can address local engineering requirements.

Be sure to check our [website](#) for more photos and details.
