DISASTER RECOVERY

Recovering from a disaster requires the ability to act quickly and with confidence. Few can match the experience of KGP Logistics for determining the most efficient method to bring a business mired in various stages of emergency situations to an “Up and Running” status.Dedicated service teams will deploy the resources necessary to verify and ship inventory, arrange transportation and track shipments for delivery.

These services are available 24/7, 365 days a year through the KGP Logistics’ emergency support line at 800-755-1950.

We are here for you. Always.

Gigabit Power in the Palm of Your Hand

ADTRAN’s ultra-compact micro Optical Network Terminal (ONT) series offers unbeatable, cost-effective delivery of symmetric Gigabit services. Our micro ONTs enable simple and discrete wall mounting right where the fiber enters, significantly limiting the amount of indoor fiber routing. In addition to streamlined installation, these ONTs offer enhanced security and are incredibly efficient, consuming less than 4W.

Our ONTs are also independent of the wireless router. This increases the life of the ONT and raises return on investment (ROI) because the ONT does not have to be replaced as Wi-Fi standards inevitably evolve.

As an ideal solution in high turnover tenant space, such as apartment units, these devices offer a wealth of advantages, including quick activation when tenants change and the ability to be left onsite, meaning no need for a truck roll to retrieve equipment.

Discover all the benefits that ADTRAN’s high-performance micro ONTs have to offer. Learn more

PREMIER - Wireless Products

Universal Weatherproofing Kit
The Universal Weatherproofing Kit is used to create an environmental seal for connections at wireless infrastructure sites. In addition to protecting the connection from water damage, it also prevents vibrations from loosening the interface.

Tape

- General purpose indoor and outdoor
- UL Listed
- Economical and durable
- 3/4” x 60’ rolls available in assorted colors

Compression Lugs

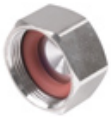
- Manufactured with High Conductivity
- Electro-Tinned Plated
- CSA Certified
- Seamless Copper Tube
- UL Listed

Heat Shrink
- Black & Clear
- UL Listed

Hose Clamps
- Stainless Steel Hose Clamp
- ALL 304 Stainless Steel

Cable Ties
Available in: • Stainless Steel - 4.6mm x 350mm (14”) • Black Nylon (7” – 18”)

PIMCAPS
- Din Male Connection PIMCAP
- Din Female Connection PIMCAP
- RF connector dust caps to absorb moisture and keep out all contaminates



DINCAPS

Protection for Din Female ports from dust intrusion and physical damage

- Din Female Cap
- IP 65 Rated
- Corrosion Resistant
- Temperature Rated: -40°C ± 85°C

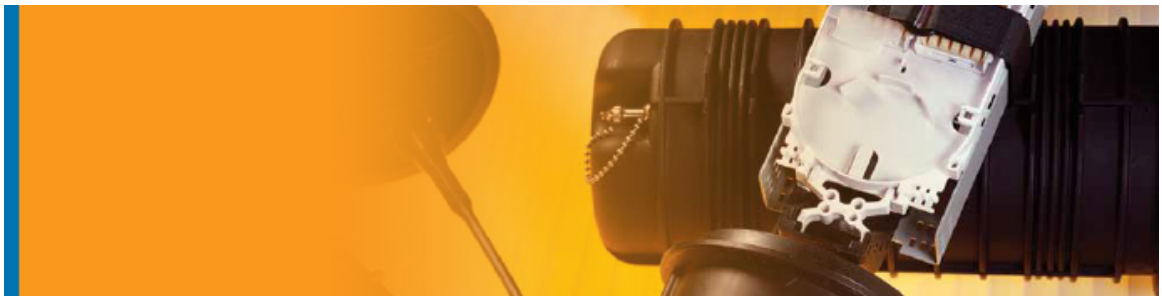
TE's FiberGuide® Optical Raceway System - Protecting Every Connection



TE Connectivity's FOSC family of fiber optic splice closures is available with gel sealing technology for cable terminations. This product line, known as the FOSC-450, can be used in any environment: aerial, pedestal, buried and underground.

These closures are available in five sizes, each featuring:

- Re-usable compressed gel cable sealing components that accommodate a wide range of cable sizes
- Capability to accommodate a variety of cable styles including loose tube or central core tube cables with single or ribbon fibers
- Hinging splicing trays that provide controlled access to splices and slack storage
- Splice and storage compartments accessible via a removable dome-clamp system
- Thermoplastic outer materials that withstand temperature and contaminate extremes
- Slack storage baskets of various sizes that provide different slack storage scenarios
- Many shared components between closure sizes
- A range of accessories for a variety of outside plant needs

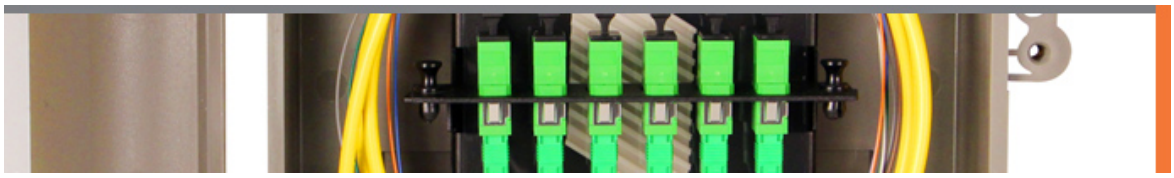
Tii Technologies - FET Series Fiber Entrance Terminals



Tii's FET Series Fiber Entrance Terminals are indoor/outdoor optical demarcation enclosures that provide a transition point between fiber drop and customer premise cable. Designed for wall or pole mounting, their small form factor is ideal for FTTH, FTTB and MDU drops where space is limited. These enclosures accommodate patch, patch/splice configurations and feature integrated splice trays with slack storage configurable for up to 24 fiber drops.

For our full line of fiber optic solutions, please visit us at www.tiitech.com

FET1 - up to 4 fiber terminations FET2 - up to 16 fiber terminations FET3 - up to 24 fiber terminations
