DISASTER RECOVERY

Recovering from a natural disaster can range from something as simple as cycling a back-up generator, to a complete system rebuild. In disaster recovery situations few companies can match the experience of KGP Logistics in knowing the most efficient way to bring a business mired in emergency back to an "up and running" status.

With service teams available 24 hours a day, KGP Logistics stands ready to deploy the resources necessary to verify and ship inventory, arrange transportation and track shipments for delivery. Our disaster recovery services are available 24/7, 365 days a year through the KGP Logistics' emergency support line at 800-755-1950.

We are here for you. Always.

AFL's FOCIS WiFi fiber inspection solution provides wireless connection of an inspection probe to a customer's smartphone or tablet. Users can view images, save and verify standards compliance using a free app. Three options are available.

- FOCIS WiFi VIEW – enables users to view live images of a fiber end-face on a smartphone or tablet to check for cleanliness and/or damage.
- FOCIS WiFi PLUS – view, save, compare and share saved end-face images via email, text or mobile cloud applications.
- FOCIS WiFi PRO – automatically analyzes connector integrity and saves, recalls and shares results via email, text or mobile cloud applications.

CommScope - EASY LIVING DESERVES AN EASY FTTH NETWORK

COMMScope®

CommScope reduces FTTH Network costs by 70%

- No splicing required
- No FDH cabinets needed
- Increase speed of deployment

Whereas traditional cascaded architectures require complex planning involving different terminals and fiber lengths, indexing uses a single configuration throughout the network. Fiber indexing offers several attractive benefits to service providers implementing a distributed architecture for their access network. Using standardized terminal, splitters and spooled fiber cable, this solution makes a good case for fiber indexing in many access applications. The addition of connectorization whenever it makes sense reduces the need for more highly-skilled labor, further decreasing overall costs.

PREMIER products are available exclusively through KGP Logistics. Contact **800-755-1950** today!

Available in select packages of 3M connectors and splices

The 3M™ Easy Cleaver is the latest cutting edge innovation from 3M. Unlike other fiber cleavers, which can cost hundreds or even thousands of dollars up-front, the 3M Easy Cleaver is conveniently included* with select packages of 3M™ No Polish Connectors, 3M™ Crimplok™+ Connectors and 3M™ Fibriok™ II Splices.

Compared to many other blade-enabled fiber cleaving tools, the 3M Easy Cleaver requires virtually no maintenance because of its diamond wire cleaving mechanism. The 3M Easy Cleaver is capable of repeatedly creating smooth end faces and is designed to perform approximately 120 cleaves per tool. A handy counter helps track the number of cleaves performed.
